receiving a request from a user at a second data terminal requiring authentication, the

second data terminal being located remotely from the centralized computer;

inputting, at the second data terminal, a second graphical representation of the [subject] user, the

second graphical representation being at least one of the captured first representations;

activating the centralized computer with an activation card to download stored

information from the centralized computer, the activation card only possessing activation means,

the card not possessing either the first or the second graphical representation of the subject;

downloading from the centralized computer information representative of the previously

stored first graphical [representation of the subject] representations;

comparing, at the location of the second data terminal, the first and second graphical

representations [of the subject]; and

authenticating the user if the first and second representations [of the subject] are

substantially the same.

Claim 14, Please renumber to Claim 15

REMARKS

Upon entry of the present amendment Claims 6, 7, 11, 12, 13 and 15 remain in the

application.

As requested by the examiner and in furtherance of the second supplemental amendment

this third supplemental amendment is being submitted to allow for proper placement of the

amendatory language within the specification. It is now contended that the application has been

placed in appropriate condition for allowance and applicant hereby respectfully requests a notice

to this effect.
